CareFlight

Why train with CareFlight?
Throughout over 30 years of operations, CareFlight’s mission has remained the same: to save lives, speed recovery and serve the community through the provision of the highest level of rapid response critical care transport.

CareFlight operates from bases around Australia using King Air Turbo prop and Rescue Helicopter aircraft to fly a combination of critical care doctors, flight nurses and paramedics to patients of all ages – we bring the hospital to the patient at accident sites, rural health facilities and on oil and gas platforms.

The CareFlight Aeromedical Retrieval Training, or CART, is a vital learning experience for all medical, nursing and paramedical personnel who are new to the aeromedical environment or are working towards a career in Aeromedical Retrieval. CART provides an insight into what it takes to be able to work within this highly challenging but rewarding aspect of modern medicine.

COURSE LOCATION:
CareFlight Education Centre, CareFlight Helicopter Base, Redbank Road, Westmead NSW 2145.

COURSE COST:
- Doctors: $2025.00 + GST per person
- Nurses/Paramedics: $1350.00 + GST per person
Note: Student & Group discounts available.
Registration cost includes all course materials and equipment, morning tea, afternoon tea & lunches. Courses are limited to 12 participants.

COURSE DATES:
Course dates and course information is available on our website or contact us on the details below.

2 DAY COURSE
- Day 1: 7:45am to 5:00pm
- Day 2: 8:00am to 5:00pm
Additional modules available
THE COURSE WILL BE FACILITATED USING:
- Simulated scenarios with debriefing
- Group discussions & activities
- Practical demonstrations
- Active participation
- Interactive classroom activities

COURSE OUTLINE
This introductory 2 day course covers:
- Retrieval platform choices
- Domestic & international retrieval
- Introduction to Aviation Physiology
- Aeromedical transport challenges
- Packaging patients for transport
- Common drugs used in retrieval
- Orientation to commonly used equipment
- Scenario based learning opportunities in aircraft simulators
- Practical viewing & exposure to CareFlight aircraft and ground operations (where available)
- Safety awareness around aircraft
- Introduction to future career options

Pre-hospital trauma and post crash survival modules available!

COURSE FACILITATORS INCLUDE:
- Retrieval Physicians/Specialists
- Clinical Nurse Consultants
- Fixed & Rotary Wing Flight Nurses
- Aircrew & Ground Support Staff
- Helicopter Retrieval Paramedics

All Facilitators are leaders in their field - Learn from the best!

“Ancient excellent introduction to the fascinating world of aeromedicine. I am inspired to learn more.”
Australian Defence Force doctor, November 2015
