

CareFlight

REGISTRAR CAREER INFORMATION EVENING

Join us for an interesting evening and a sneak peek into the exciting, challenging and fast-paced world of retrieval medicine.

CareFlight is an aeromedical charity, established in 1986. Our mission is to save lives, speed recovery and serve the community.

We use helicopters, aeroplanes, jets and road ambulances to bring a hospital level of care to patients. Our critical care doctors and nurses are specially trained in pre-hospital and transport medicine. They look after severely injured people who need emergency treatment at the scene of the accident, and seriously ill people who need to be moved between hospitals.

What to expect on the evening

- Meet the CareFlight team of specialists and hear their personal stories
- Find out how CareFlight can enhance your career
- Meet the rapid response trauma team at our Westmead operations base
- Get 'hands-on' with CareFlight's MediSim simulators and equipment
- There will be food and drinks provided, partners are welcome to attend.
